THE BANK STATEMENT.

Saturday, May 25-p. m. By the operations of the Sub-Treasury in this city during the week ending Friday night the associated banks gained \$743,491. The weekly bank statement showed an increase in loans of \$4.755,600, an increase in legal tenders of \$3,500,200, and

Gallatin National an increase in specie of \$788,300. Deposits increased \$8,125,600, and the total reserve now stands at \$89,451,900, being an increase of \$4,418,500. The statement is natural and favorable enough, Harris showing that business is in a normal condition. Hinter River.

The distribution of Loral to the distribution of the distribu banks by the bond syndicate was apparently not continued. It might have been expected that the specie would show a decrease expected that the specie would show a decrease; perhaps the gold did decrease, while the receipts of silver certificates offset this loss and more. Still the banks almost constantly receive a little gold from the West. The result of all the changes during the week was an increase in the surplus reserve of \$2,387,250, and the banks held in excess of legal requirements \$39,975,150, against \$37,562,900 last week and against \$77,601,700 in the corresponding week last year and \$25,439,925 in 1892.

While the general market was irregular at the opening, the movements upward in the specialties mentioned affected the whole trading, and prices became better. Toward the close, however, the Weather Bureau's prediction of frost for Sunday caused alarm, and a reaction ensued. The Graningers dropped promptly to below last night's final figures, save Burlington, which held on to a gain of \$\frac{3}{4}\$ at 80\%. Meanwhile the wheat market had started up again, and the seesaw relation between cereals and securities was re-established. Jersey Central, which had touched 102\%, also receded, and was left at the last with a net gain of only \$\frac{3}{4}\$ at 10\%. Many minor stocks on the general list held final fractional advances without due cause. The internationals were comparative killing frost to affect the Industrials, and Tobacom made a lively advance to 114\%, and closed at 114—a net advance of 2\%.
